About Me

As a Full Stack Developer with over 10 years of professional experience in software development, I possess expertise across a broad spectrum of technologies. I am proficient in PHP, SCSS, HTML5, CSS3, JavaScript, ReactJs, NextJs, SQL, REST API, Ajax, and WebSocket. I embrace the concept of 'pixel-perfect' CSS in the software development process, creating aesthetic and functional user interfaces.

Education

2005 – 2009 Yıldırım Ticaret Meslek Yüksek Okulu

Database Programming and Computer Programming

Work Experience

2022 – 2024 Sakans Yazılım Teknolojileri

Developed specialized projects involving HTML, CSS, ERP, and CRM. Created user-friendly software using PHP, NextJs, and other

2018 – 2022 Freelance

Developed web applications and software for various clients. Utilized modern web technologies and frameworks in the projects.

2015 – 2018 Espro Interactive

Developed and maintained web-based applications. Played an active role in both front-end and back-end development processes.

2013 – 2015 Netfikir Bilişim

Designed and developed front-end aspects of websites. Optimized user interfaces and made performance improvements.

Technical Skills

Php	Expert
Css 3	Expert
Html 5	Expert
Javascript	Expert
Sql	Expert
React.js	Intermediate
Next.js	Intermediate

Successfully collaborated with team members in various projects, ensuring effective communication and cooperation to achieve project goals.

Leadership

Led a small team, effectively delegating tasks and guiding colleagues to successfully complete projects. Demonstrated strong leadership and team management skills while maintaining high standards of quality.

Recent Projects

Personal Portfolio Website - Frontend Projesi - [review ->](#)

My personal portfolio website was developed to provide a modern and user-friendly interface. The site is built with Next.js and TailwindCSS, ensuring a responsive design that adapts seamlessly to all devices.

Zümrüt Hukuk Danışmanlık - Frontend Projesi - [review ->](#)

The frontend project I developed for Zümrüt Law Consultancy was designed to be responsive using HTML5, CSS3, and JavaScript. The project provides a professional web interface for the firm with interactive elements and a mobile-friendly design.

ERP Projesi - Fullstack Projesi - [review->](#)

The ERP system was developed using PHP, SCSS, JavaScript, and Socket.io to integrate the company's business processes. The project ensures a smooth workflow with real-time data updates and a complete full stack development approach.
